Paul,
9 would be better since all facilities staff will still be here in the event of a problem

Paul,
you can get OT for this emergency response activity.
Julie

Important Message Please Read Carefully

On Saturday May 2, 2009, there will be a planned power outage from 7-11 AM to transition the "Tower Building" from the existing generators to new generators. I am assured that this should go smoothly and that there will be the contingency of switching to back-up power in the event of a catastrophic failure. The advantage of a planned shutdown is that we can put provisions in place to minimize disruption/ assure safety & security. I've started thinking about this but I'm sure that I have not thought of everything. Please take a look at the list below, think about anything I may have missed & we'll get together in a week or so to discuss. Thanks.

Julie

Late April

UMMS will arrange for state trooper for drug lab

JN will notify LRN-C that we will be down on 5/2/09

UMMS will alert re Fridgerator truck company of the planned shutdown (worst case scenario- trucks to keep things cold)

Investigate options for handling of emergency calls (SLI is the DPH on-call for weekends)

Friday 5/1/09

Turn off delicate analytical instruments

Key lock secure laboratory doors when leaving (chuck can we key lock drug lab doors?)

JN will provide JN (John Nickerson) a list of any staff who may come to the lab that day

Saturday 5/2/09

State Trooper detailed to the Drug Laboratory

Should we have staff come in to restart instruments, reset alarms etc?

Other considerations????
